CREW
CLASSIFIED READY
EMPLOYEE WORKFORCE

Strengthen Your Cleared Workforce Pipeline

The **Classified Ready Employee Workforce (CREW)** Program prepares students to enter the national security sector. We partner with industrial defense companies and agencies to provide programming that will enhance your company's current internship or co-op program, in support of a robust workforce pipeline.

Exclusive to the NMSU CREW Program, selected students receive advanced national security affairs training and obtain their **DoD security clearance***. PSL can work with your team to support remote-work opportunities on the NMSU campus at the Physical Science Laboratory in Anderson Hall, a **cleared contractor facility**.

Leverage PSL's experience as a DoD contractor and expertise in **Telemetry, Missile Systems, Electronic Warfare, Cybersecurity, Unmanned Aerial Systems and Scientific Ballooning** to attract and recruit your company's future leaders and innovators.

**DOE Reciprocity*

CREW Co-Op Industry Sponsors have included:

BlackSky, General Dynamics, Lidos, Los Alamos National Laboratory, Northrop Grumman, Sandia National Laboratories, and X-Bow Systems Inc.

PSL Division Directors and Department Managers have also invested in the program and have developed CREW positions in our Telemetry and Missile Systems Division, Information Sciences & Security Systems Division, Facility Security, Information Technology and Quality Assurance departments, and Information Security Operations Center

Cleared Students, Secure Facility

Deadlines for 2023/2024 Co-Op Employers

March 1, 2023 for Industry Sponsors wishing to begin student co-op in Summer 2023

May 1, 2023 for Industry Sponsors wishing to begin a student co-op in Fall 2023
